

First Iteration User Stories:

By Victor Wang

We decided to implement the following user stories as required by the customer:

EP1-U2: Administrator Survey Operations: (total size 4)

Survey Creation (fully implemented)

Survey Storage (fully implemented)

Survey View (fully implemented)

Survey Edit (fully implemented)

Implemented Size: 4

EP1-U3: Administrator Question Pool Operation: (size 2)

Question Pool Creation (fully implemented)

Question Creation (fully implemented)

Question Storage (fully implemented)

Question View (fully implemented)

Question Edit (fully implemented)

Implemented Size: 2

EP1-U4: Administrator Result Operation: (size 3)

Result Storage (partial implemented)

Implemented Size: 1

EP2-U2: Respondent Access Operations: (size 3)

Respondent can answer the survey (partially implemented)

Result Storage (partially implemented)

Implemented Size: 2

Expected Iteration User Story Total Size: 13

Finished Iteration User Story: 9

(*Questions and result manipulation and design turned out to be much harder than the team initially expected)

We choose these stories because they are high priority user story and is directly required by the customer.
